

### DESCRIPTION

Shield's Radiator Water is a coolant fluid used in systems where a radiator is present. The fluid is fluorescent green in color, and is formulated to consist of special additives such as corrosion inhibitors to protect your vehicle parts. This coolant can be used during the summer and in moderately cold weather.

### FEATURES

Excellent corrosion protection

Compatible with rubbers

Outstanding engine cooling

Moderate service life

### APPLICATIONS:

Shield Radiator Water is recommended for use in most commercial passenger vehicles and trucks requiring a water-based coolant fluid.

### TYPICAL PHYSICAL PROPERTIES

SL#	Characteristics Unit	Test Method	Values
1	Density @ 15°C	ASTM D 1298	1.0
2	pH		7
3	Freezing point, °C		-1
4	Color	ASTM D 1500	Green
5	Appearance	ASTM D 4176	C&B

\* Exact specifications may slightly vary from the above, but within the international standards
